

I am concerned about the possible loss of K-love's FM broadcast if LPFM is implemented. K-love is a source of music, encouragement and news that is not easily found or is under-reported elsewhere. Of even greater importance is the fact that K-love is NOT a source of demeaning, sexist comments that are common on other stations in this area. Clearly, K-love adds to diversity in this area by providing perspective and music that others fail to report or provide. Loss of K-love's broadcast would have a stark negative impact on diversity in the air waves of the Triangle. This added diversity, and the lack a need for delay or "bleeping" in their broadcast is testimony to the fact that K-Love has long demonstrated a commitment to a respectful broadcast that provides resources to a group that is often treated with discrimination.
